

OIL REPELLING AGENT

ABSTRACT OF THE DISCLOSURE

An oil repelling agent to coat a dynamic pressure device, such as a fluid dynamic pressure bearing device, includes a UV coloring agent, a fluorine-based polymer and a solvent. In an exemplary embodiment of the invention, the density of the UV coloring agent component is about 100 PPM to about 400 PPM, and the density of the fluorine polymer is about 0.1% by weight to about 0.6% by weight.
